Information Session and Advising:
Get the information you need and personal assistance all at once.

Nursing is one of Columbus State's more popular health programs. Daily, advisors will see several pre-nursing students to explain the requirements and application process. Often the student numbers exceed the advising resources especially close to registration periods and at the beginning of a quarter. In an effort to allow you to get the information you need in a timely manner we are offering an alternative option to an individual appointment time. In this optional advising mode you will get information that every Pre-Nursing needs to know. The entire session should last approximately one hour. The first 20-30 minutes will include information about the admission requirements, application process, and nursing degree requirements. In the remaining time we will teach students how to develop their best academic plan and review your plans and answer any questions. The option for a traditional half hour appt. is still available. This mode will only be offered when traditional appointment times are filling quickly. To attend please check- in on Monday July 27th by 9:45 in AQ 116. For best service, although not required, e-mail sdowning@csc.edu with your name and Cougar ID#. Please do not bring guests to the session as space will be limited. If guests do accompany you and the session is filled they will not be admitted and will need to wait in the lobby.
