Undecided about which Health and Human Services option to choose?

Visit Career Services:

If you are completely undecided about your career then you may want to consider checking out the information on Career Services website at csc.edu/services/careers or schedule an hour long appointment to meet with a career counselor. Services are free to currently enrolled students. They will assist students with integrating their academic and life experiences with their career goals.

You may also want to check out these career websites: bls.gov or explorehealthcareers.org.

Enroll in MULT 1160:

Exploring Health Care Professions (A, SP, SU) 1 credit hour

This course is designed to help the student explore and understand his/her personal and professional interest as a health professional. [Lecture: 1 hour](#)

See a Health and Human Services Advisor:

We can review information about HHS programs and your options including creating a plan of study to get started. See our contact information including how to schedule an appointment on-line at: csc.edu/hhs-advising.

Review Program Information:

Find out information about majors including admission requirements, deadlines, and the degree requirements by going to the department's website: csc.edu/academics/departments

Attend an Information Session:

Many health majors require attendance at a mandatory information session to apply to the program, but you may also want to attend to get a general overview of the program. Dates for information sessions can be found on the department home pages.
