We Are Vulnerable with Everyday Activities

344x The average amount of times Americans check their phones (once every 4 minutes)

73% of passwords are duplicated across work and personal accounts

Our Approach to Cyber Safety

Identity Theft Protection

Proprietary technology monitors for fraudulent use of our members' SSN, name, address and date of birth. The patented system sends alerts by text, phone, email or mobile app when a potential threat is detected.

Device Security

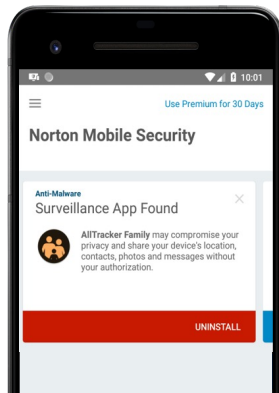

Multi-layered, advanced security helps protect devices against existing and emerging malware threats, including ransomware, and helps protect private and financial information when employees go online.

Online Privacy

Protect devices on vulnerable connections through bank-grade encryption to keep information private. We also scan common public people-search websites for employees' info and help them opt-out.

Three Simple Steps

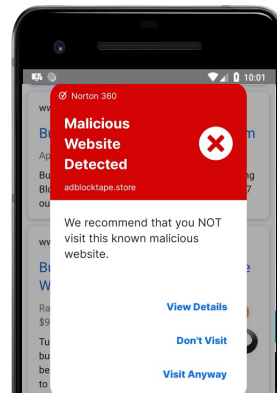

Our Product in Action

STEP 1

BLOCK & LOCK

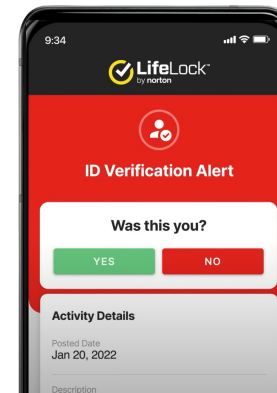

- Our protective features are stopping cyber threats before they affect devices
- Enable the user to lock access to credit and financial accounts

STEP 2

SCAN & ALERT

- Monitors threats to your identity and financial accounts (extending to telco and utilities)
- Alerts by phone, text, email, or mobile app when a threat is detected

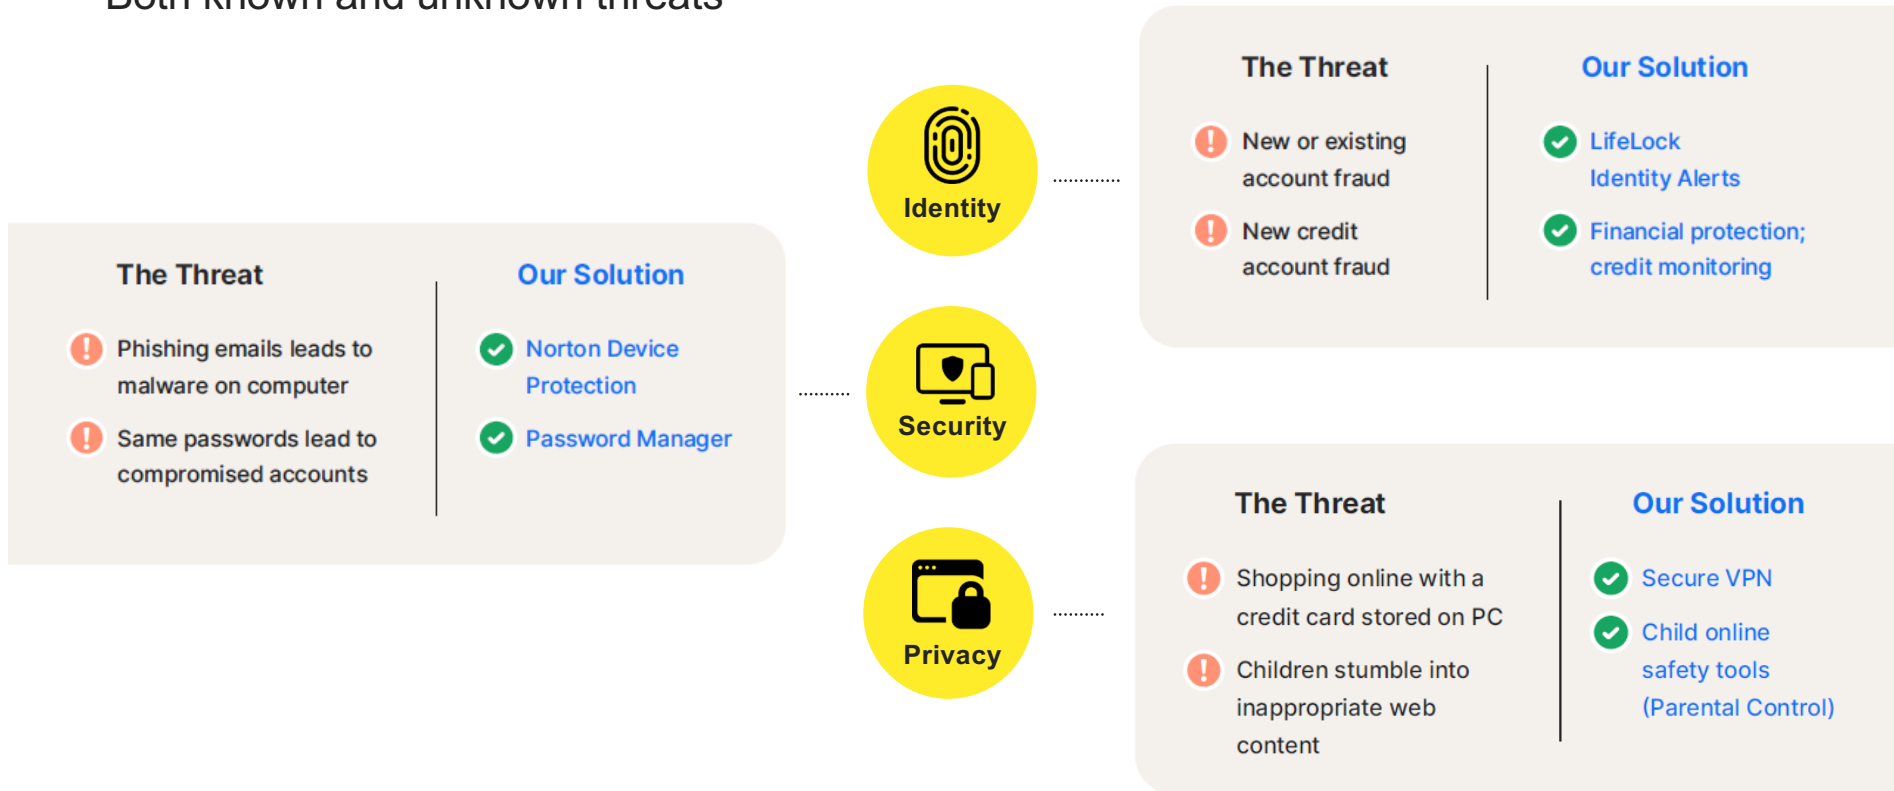

STEP 3

FIX & REIMBURSE

- Restoration Agents help resolve identity theft or device-related intrusions
- Reimburse funds stolen from identity theft up to \$3M
- Assign lawyers and experts if needed with no upfront or out-of-pocket cost

We Help Combat Everyday Digital Threats

Both known and unknown threats
